MICHIGAN STATE UNIVERSITY
COLLEGE OF NURSING

NUR 822
PRACTICUM FOR THE
PRIMARY CARE FAMILY
APN I

COURSE SYLLABUS
CREDITS: 6

Course Chair:
Katherine Dontje, MSN, APRN, BC, FNP

Clinical Instructors—Lansing
Brigid Warren, R.N., M.S.N.
Anne Teitelman, Ph.D., MSN, APRN, BC, FNP

Clinical Instructors—Grand Rapids
Pam Nethery, MSN, APRN, BC, FNP
Donna Rinker, MSN, APRN, BC, FNP

Fall, 2003

MSU is an Affirmative Action/Equal Opportunity Institution
OURSE OVERVIEW

Course Description

This course is designed to provide opportunity to integrate assessment skills and apply theory to primary care management of clients across the life span. This will be done within a collaborative model of primary care practice. The emphasis is on developing skills in health promotion, health maintenance, risk reduction strategies and management of common single acute conditions. This will be done for individuals within the context of the family. Documentation will be done in the problem oriented format to facilitate organization of client data.

Course Objectives

At the completion of this course the student will be able to:

1. Provide health promotion, disease prevention and risk assessment services to clients based on age, gender, health risk, ethnicity and cultural background.

2. Apply appropriate diagnostic and therapeutic interventions (both medical and nursing) to manage client’s health/acute illness status in a primary care setting.

3. Integrate applicable conceptual and theoretical frameworks in the development of a comprehensive management plan.

4. Communicate data appropriately as evidenced by documentation including relevant individual and family assessment, and medical and nursing management plans.

5. Demonstrate progression in the level of decision making from preceptor made decisions to student mastered with preceptor validation.

6. Demonstrate professional development by initiating strategies for interdisciplinary team functioning with awareness of professional, ethical, legal and political issues.

7. Critically evaluate outcomes and effectiveness of care.

8. Begin development & application of a personal practice philosophy related to pt encounters in a primary care setting.

INSTRUCTIONAL METHODS
As adult learners, it is expected that students will do relevant reading and study prior to clinic and class on the topic areas identified. Faculty directed readings and web links will be provided for specific content areas. It is expected that students will search the literature and suggest/share relevant findings with faculty and classmates. Case presentations, peer review, specific topic presentation and other methods determined by the faculty will be the basis for this guided cooperative discussion. Guidelines for class interactions and specific methodology are located in BlackBoard, Course Documents.

**Clinical Experience**

- All students participate in **16 hours of clinical per week for 14 weeks** at designated agencies. The agency experience is guided by the clinical preceptor at that agency. Clinical faculty in the college are available for consultation, assistance and evaluation. If at any time a student is deemed clinically or ethically unsafe by preceptor or faculty, the student will be reported to the appropriate college administrator and action will be taken.

- Students are not to start clinical rotations until the 1st week of September.

- The last week for clinical experiences will be December 4th.

- Students will provide direct services to adult clients and their families concerning well care, health maintenance and promotion, level of function and management of single acute illness. The caseload will include clients from birth to elderly.

- Students are responsible for increasing independence in collecting and determining:
  - Client history and physical examination
  - Management plan including nursing and medical interventions
  - Nursing and medical diagnoses
  - Recording on the patient record using the SOAP-POR method

- Documentation will be completed on every client encounter. The student will begin to generate outcome criteria for each management plan and form a master problem list and up to date medication list. All documentation will include:
  - Subjective data
  - Objective data
  - Assessment data
  - Medical diagnoses
  - Nursing diagnoses (only those appropriate & that truly represent non-medical)
Management Plan
- Diagnostic studies (lab, special studies, radiographic, etc)
- Non-pharmacologic interventions (education, counseling, NIC/NOC when appropriate, etc)
- Pharmacologic interventions
- Patient teaching
- Expected outcomes
- Referral
- Follow up

HIPAA Guidelines: since you have been educated about these federal regulations, you know the following is expected at all times:
- All patient identifying information must be blocked out in black prior to copying or distributing to faculty or classmates
- All information copied from the clinical site must be shredded by the student after use and prior to spring semester
- Instead of copying patient information from the chart, it is expected that you will transcribe pertinent information from the medical records and include in your SOAP documentation

Clinic Activity Log
- This log will be utilized beginning in NUR 822 and carried through to NUR 824. The log helps all interested participants in the clinic experience understand what skill, technique or experience has been accomplished or needs to be accomplished.
- The log must be updated and validated on a daily basis to be kept current and accurate.
- The log is an excellent documentation tool that students can use in portfolio development and in seeking future advanced practice nursing employment.
- The actual tool can be found in BlackBoard, Course Information.

Caseload Data
- This section includes the Client # Log and the Client Encounter Log (both can be found in BlackBoard, Course Information).
- Students are required to collect and record data on every client seen. Data logs will be reviewed weekly, during midterm and finals week and at any time during the course of the semester. Both logs should be brought to class every week so faculty can review the information.
• The Client Encounter Log will be handed in on a weekly basis. Information needs to be neat and accurate.

**Web-Based Activities**

• We are utilizing BlackBoard (BB) as the basis for this course. BB is a web-based classroom experience that allows material to be up to date with easy access. It is the individual students responsibility to learn how to work through the system.

• Weekly readings, course information and forms, course documents, activities, grades and discussion board are all located in BB. It is strongly suggested that you check into BB on a frequent basis at it is the students responsibility to be present and active in the course.

• Access to BB is through the College of Nursing web page and then accessing NUR 822 course syllabus. Another route is [http://www.blackboard.msu.edu](http://www.blackboard.msu.edu) Access requires use of your MSU pilot account.

• Guiding Principles have been developed for the use of the Discussion Board and email. You will find this document in BB, Course Information. Please be sure that you are very familiar with these principles.

**COMMUNICATION DEVICES**

All communication devices are to be turned off during the entire course time. If you need to be reached for an emergency, you may give the College of Nursing main office number and emergency messages will be delivered to you by support staff.

**STUDENT RESPONSIBILITIES**

Weekly attendance at clinical conference is MANDATORY! Additional student responsibilities and expectations can be found at BlackBoard, Course Information. It is the student’s responsibility to understand what the expectations are for successful completion of the course.

**Students are expected to enter NUR 822 with adequate physical assessment and documentation skills for the advanced practice level. Additionally, a comprehensive knowledge base in pharmacology and pathophysiology is expected.** Remediation at this level will be done independently (with faculty approval and guidance) prior to re-enrollment in the clinical course sequence.

Immunizations, licensure and CPR must be current and up to date or the student will not be able to participate in the clinical experience. If this occurs, the student will have to drop out of the current course sequence and seek re-enrollment the following fall.
COURSE EVALUATION & GRADING

A grade of 3.0 (80%) must be achieved in order to pass NUR 822 and progress in the nursing program. The MSU 4.0 grading system will be utilized to report final course grades.

Points will be rounded to whole numbers using the 0.5 rule. Points at ≥ 0.5 will be rounded up while those < 0.5 will be rounded down to the nearest whole number.

The following point scale will be used for final grade determination:

<table>
<thead>
<tr>
<th>RANGE</th>
<th>GRADE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low</td>
<td>High</td>
</tr>
<tr>
<td>141</td>
<td>150</td>
</tr>
<tr>
<td>131</td>
<td>140</td>
</tr>
<tr>
<td>120</td>
<td>130</td>
</tr>
<tr>
<td>111</td>
<td>119</td>
</tr>
<tr>
<td>105</td>
<td>110</td>
</tr>
</tbody>
</table>

Point Determination Will Be As Follows:

- Clinical Evaluation: 100
- Professional Participation: 25
- Course Activities: 25
- Encounter & Activity Logs: P/F

Total = 150

A clinical evaluation form will be completed by the student and the course coordinator at midterm and at the conclusion of clinical. The rating at midterm is expected to be at a low level since it is highly unlikely that a student will be meeting end course objectives at this time. The midterm point totals are utilized to help identify
areas that need work. The midterm evaluation is NOT used to calculate the final grade. Only the rating on the final evaluation will be used to determine the course grade.

The final evaluation will count for a possible 100 points toward the final grade. The student is expected to provide rationale/evidence for their self rating if it exceeds a #2. The course coordinators evaluation will be used to calculate the final grade. If there is a discrepancy, the student must provide documentation. The final grade decision is determined by the course coordinator.

The Clinical Evaluation Tool can be found under Course Documents.

NOTE: If the Clinic Activity Log, Encounter Logs or Course Activities are NOT COMPLETED in an ACCEPTABLE MANNER (spelling, accurate & appropriate abbreviations & medical terminology, etc), the student will not pass the course regardless of their performance in the clinical setting. All course forms and materials must be completed in a timely fashion and be presented in a legible, organized manner.

**ADDITIONAL COURSE INFORMATION AND FORMS WILL BE LOCATED IN BLACKBOARD**
